*Project Manager / Web Developer*

Orange County, CA | (714) 277-9315 | [j@jparks.io](mailto:j@jparks.io)

## Objective

To join a team that is in a constantly challenging and dynamic environment utilizing technology to best serve the needs of clients and end-users in their interaction and use of digital environments.

## Overview

Over the course of my career I have learned many different platforms and successfully adapted those platforms to meet the needs of clients. Whether it be through a CMS such as Craft, SilverStripe, Wordpress, October CMS or a PHP framework such Laravel, my goal is to take the requests of the client and create a solution that works.

## Summary of Qualifications

- Over 15 years of web programming, design, testing, deployment of custom integrated solutions using Wordpress, Squarespace, Wix, Weebly, Craft CMS, Magento, Moodle, and other content management systems for educational, religious and multi-million companies.
- Solid understanding of OOP, MVC architecture for coding using PHP, Javascript, JQuery, Web API Rest, UML schema of a database model and LAMP installation, implementation and maintenance on Ubuntu servers.
- Excellent communication, writing and interpersonal skills, ability to work as part of an integrated team as well as independently to complete a task from start to deployment.

## Career Highlights

- Migrated MySQL Database to AWS containing millions of records with zero downtime and zero errors
- Designed, Developed customized Magento store with scripts to work with antiquated inventory system to maintain correct inventory count and increased sale reach.
- Increased online viewership potential 166% through integrated live-streaming technologies while reducing streaming costs.
- Created backend systems that allowed non-technical people to update websites increasing efficiency in maintaining multiple websites.
- Pioneered MySQL relational database for multi-million dollar company putting thousands of products on customized website thus increasing sales.
- Developed MySQL relational database to manage media content for multiple multi-million dollar corporations resulting in increased website traffic.
- Designed, developed database-driven dynamic website for multiple multi-million dollar corporations creating exposure for the companies.
- Integrated Google Maps API with customized database of 1,700 worldwide-locations for users to find the closest one to their area.
- Produced a website for Campgrounds of New York (CONY) increasing number of campers utilizing designated areas for camping in New York.
